1. The following is an examiner's statement of reasons for allowance:

As stated in the Office action mailed 07/29/2004:

Specifically, the examiner could not find a program tool (CAD system or otherwise) configuring interconnect logic that requires exchange of data between cores to proceed by way of at least one shared memory system. Any prior art related to this concept is requested.

Applicant responded accordingly in the Remarks filed 10/25/2004:

However I have reviewed the original GB file and the source documents (as the inventors' internal invention disclosure form') and have not found any reference to prior art or any search for it. The invention as particularly described employs a known hardware design language verilog but I do not think that is what the Examiner has in mind (and in any case the specification makes this clear throughout). So far as I am aware feature (b) in claim 1 was a novel design constraint, which is clear from the inventors' notes.

The prior art made of record (i.e. Fishburn et al. (5,633,807) and Matsumoto (5,563,800)) neither teaches nor render obvious feature (b) of claim 1. Likewise, documentation retrieved during a STIC library search (essentially of record in the scanned filed) does not teach feature (b) of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-10 are allowable over the prior art of record.

Any response to this action should be mailed to:
